

World Class Information Systems, Inc.

**World Class Barcode (WcBc)
Product Profile**

WcBc

The WcBc software is designed to run on your iSeries™ without any MAPICS™ Modifications. Our data collection software has an uptime comparable to your iSeries™. WcBc includes complete Receiving, Inventory, Manufacturing, Cycle Counting, and Shipping Transactions.

The WcBc software has a menu-driven interface enabling users to tailor each transaction to meet your process requirements. WcBc simplifies the use of each transaction by prompting or defaulting only the fields that the user needs to perform the function. Each of the following programs could have many different transactions for them, and each one could be prompting for different information but processing the same end function.

Description	Function
Inventory Issue (IS)	Used to remove inventory from a location.
Inventory Transfer (TW)	Used to transfer material from one location to another.
Inventory Adjustment (IA)	Used to adjust material at a location.
Item Availability Inquiry	View inventory by item, location, and lot.
Receiving (RP)	Used to receive items into the facility by purchase orders.
Open P/Os	View open P/O by item, address, or P/O types.
Inventory W/O Issue (IP)	Used to issue material to manufacturing W/O.
W/O Completion (RM)	Used to receipt inventory from a manufacturing W/O.
Miscellaneous Receipt (RC)	Used to receipt inventory from a miscellaneous order.
W/O Component Scrap (SC)	Used to scrap components from a manufacturing W/O.
Inventory Scrap (SS)	Used to scrap inventory from a location.
Sales Order Issue (SA)	Used to issue material to a sales order or pick slip.

* Note : We have many combined transactions for a smaller number of entries on the Handheld Computers.

The WcBc has a layer of Processing Options on top of the MAPICS™ software giving each WcBc transaction the ability to override the normal flow of the Transaction.

The WcBc transaction can be called/utilized from any Custom Application. The Call can be from sending a Data Queue or by Calling the Program.
